Module Control Panel

Features

Digital control

Adopting digital control design, and the control system is more reliable

19inch standard cabinet

Adopting 19 inch standard cabinet design.

High power density design

Capacity of single power module is 6KVA/10KVA/15KVA/20KVA/25KVA/30KVA/40KVA, the height of all these modules is 3U. Numbers of power modules is up to 5 for the 1.4 meter high cabinet, numbers of power modules is up to 13 for the 2 meter high cabinet. The power of system ranged from 6KVA to 520KVA corresponds to the number of parallel power modules from 1 to 13, power of the system ranged from 800KVA to 1280KVA corresponds to power modules from 20 to 32 by analogy. All of the power modules is hot swappable.

Parallel expansion cabinet

Support parallel expansion for cabinet, and parallel expansion is up to 4 cabinets.

N+X parallel redundancy

Redundant power modules can be configured flexibly. If the redundant power is up to 2 or above, module reliability of the system is up to 99.999%, and the MTBF (Mean Time Between Failures) is more than 250000 hours.

Redundant control system

Every power module is equipped independent control system, and control itself independently according to the sharing message, and the fault module separates from the system automatically.

Distribute current joint cabinet

Distribute current joint layout, ensures the safety of parallel system.

Sharing the batteries

The batteries can be shared by the parallel UPS power modules or cabinet.

Voltage of batteries can be configured flexibly

1 input 1 output / 3 input 1 output $\pm 96Vdc / \pm 108Vdc / \pm 120Vdc$ (16/18/20PCS) selectable;

3 input 3 output $\pm 216Vdc / \pm 228Vdc / \pm 240Vdc$ (32/34/36/38/40PCS) selectable

Intelligent charging mode

Charging current can be configured, there are 3 charging mode which are constant current mode, constant voltage mode, floating charging mode, and the charging mode can be transfer smoothly.

Battery module or battery cabinet can be selectable

Battery module is 3U standard rackmount and can contain 18 pieces of 7Ah batteries or 9Ah ones;

Appearance of customized battery cabinet is the same with the UPS.

LCD display

Cabinet is equipped with large touch screen of which language can be chosen as English or Chinese. Each power module is equipped with LCD orled.

Maintenance bypass

The UPS is equipped with Maintenance bypass.

EPO function

Emergency power off function.

Intelligent management

RS232 (USB) / RS485 communication interface.

SNMP card (optional)

Relay card (optional)

Centralized monitor module that is hot swappable.

6kVA /10kVA 1:1 phase
6kVA /10kVA 3:1 phase

40kVA 3:3 phase

10kVA /15kVA / 20kVA / 25kVA
